Python Basics Assignment

Q1. Using Python script as a calculator
Create the variables n, r, p and assign them values 10, 5, and 100 respectively. Then evaluate the following expression in the Python console.

$$A = p \ (1 + r/ \ 100)^n$$

    a. 100
    b. 162.89
    c. 189
    d. None of the above

Q2. In a given string format operation, how will you print the given string.
A = 10
B = 20
Str = "There are {} students in the class, with {} who play at least one sport."
    a. print(string.format(a,b))
    b. print(string+a+b)
    c. print(string.format(b,a))
    d. None of the above

Q3. In a given sample string, How do you print a double quoted string in between a regular
string using the escape character?
Sample output = It goes without saying, "Time is Money", and none can deny it.
    a. print("It goes without saying, \"Time is Money\", and none can deny it.")
    b. print("It goes without saying, \Time is Money\, and none can deny it.")
    c. print("It goes without saying" + "Time is Money" + "and none can deny it.")
    d. None of the above.

Q4. What will be the output of the following code?
x = lambda a,b: a//b
x(10,3)
    a. 3.3333333333
    b. 3
    c. 30
    d. 1000

Q5. What will be the output of the following code?
A = 10
B = 12
print("Smaller") if A == B else print("Greater") if A < B else print("True")
    a. True
    b. Smaller
    c. Greater
    d. None of the above

Q6. What will be the output of the following code?

```
import os
import numpy as np
my_list1 = [2,7,3,5,4,6]
print(my_list1)
arr_1 = numpy.array(my_list1, dtype = int)
print(arr_1)
```

a. [2 7 3 5 4 6]
b. TypeError
c. NameError: name 'numpy' is not defined
d. None of the above

Q7. Create a string called 'string' with the value as "Machine Learning". Which code(s) is/are appropriate to slice the substring "Learn"?

a. string[slice(13,8,1)]
b. string[slice(1,8,1)]
c. string[8:14]
d. string[slice(8,13,1)]

Q8. Create a sequence of numbers from 10 to 25 and increment by 4. What is the index of the
value 18?

a. 3
b. 2
c. 0
d. 1

Q9. Which of the following is true with respect to the below codes?

```
num1 = 5**4
num2 = pow(5,4)
print(num1,num2)
```

a. num1 = num2
b. num1 ≠ num2
c. num1 < num2
d. num1 > num2

Q10.A Python NameError exception is raised when: -

a. Trying to access a variable which has not been defined
b. Trying to access a key in a dictionary that does not exist

c. Accessing a column with misspelled column name

d. Accessing the function from a module that has not been imported

Q11. What type of exception will be raised for the code given below?

```
x = "string"
int(x)
```

a. NameError

b. KeyError

c. ValueError

d. AttributeError

Q12.A **FileNotFoundError** exception is raised by operating system errors when: -

a. Trying to create a file or directory which already exists

b. A file or directory is requested but does not exist in the working directory

c. Trying to run an operation without the adequate access rights

d. A directory operation, os.listdir() is requested on something which is not a directory

Q13. Consider a variable Z. The value of Z is "ID-5632". Data type of Z is: -

a. Complex

b. Character

c. Integer

d. Boolean

Q14. Which of the following variable(s) are character data type?

a. K= "4"

b. J= "Welcome"

c. L= "?"

d. All of the above

Q15. Choose the symbol/s that **does not** have the ability to convert any values to string?

a. ( )

b. " "

c. {}

d. #

Q16. Create a dictionary 'Country' that maps the following countries to their capitals respectively:

Country	India	China	Japan	Qatar	France
State	Delhi	Beijing	Tokyo	Doha	Marseilles

Find 2 commands to replace "Marseilles" with **"Paris"** is:

Q17. Create the tuples given below

tuple_1 = (1,5,6,7,8)
tuple_2 = (8,9,4)
Identify which of the following code does not work on a tuple.

a. sum(tuple_1)
b. len(tuple_2)
c. tuple_2 + tuple_1
d. tuple_1[3] = 45

Q18. How many elements in the following data structure?

```
S={1,2,3,4,4,4,5,6}
```

Q19. Write a function which finds all pythagorean triplets of triangles whose sides are no greater than a natural number N.
